European Journal of Operational Research 117 (1999) 618–620

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 117

1 Fiber-to-object assignment heuristics
F. Sourd and P. Chrétienne

15 Routing and capacity assignment in backbone communication networks under time varying traffic conditions
A. Amiri and H. Pirkul

30 On design of a survivable network architecture for dynamic routing: Optimal solution strategy and an efficient heuristic
I. Ouveysi and A. Wirth

45 "Value" of additional information in multicriterion analysis under uncertainty
S.H. Azondékon and J.-M. Martel

63 Rough approximation of a preference relation by dominance relations
S. Greco, B. Matarazzo and R. Slowinski

84 Quantitative parametric connections between methods for generating noninferior solutions in multiobjective optimization
D. Li, J.-B. Yang and M.P. Biswal

100 Multiobjective transportation problem with interval cost, source and destination parameters
S.K. Das, A. Goswami and S.S. Alam

113 An interactive fuzzy satisficing method for multiobjective nonconvex programming problems through floating point genetic algorithms
M. Sakawa and K. Yauchi

125 Approximation methods for non-convex curves
Y. Liu, K.L. Teo and X.Q. Yang

136 Accelerating the convergence of subgradient optimisation
B.M. Baker and J. Sheasby

145 A concept of equilibrium for a game under uncertainty
M. Larbani and H. Lebbah

157 A heuristic to minimax absolute regret for linear programs with interval objective function coefficients
H.E. Mausser and M. Laguna

175 Solving the multiobjective possibilistic linear programming problem
M. Arenas Parra, A. Bilbao Terol and M.V. Rodríguez Uría

183 Johri's general dual, the Lagrangian dual, and the surrogate dual
T. Nieuwenhuizen

197 Book Review
H. Fleuren (ed.)

199 The value of combining forecasts in inventory management – a case study in banking
C.K. Chan, B.G. Kingsman and H. Wong

211 Inventory control under speculation: Myopic heuristics and exact procedures
S. Gavirneni and T.E. Morton

222 Optimal stopping problem with recall cost
B.-K. Kang

239 Maximizing a concave function over the efficient or weakly-efficient set
R. Horst and N.V. Thoai

253 On the flexibility of constraint programming models: From single to multiple time windows for the traveling salesman problem
G. Pesant, M. Gendreau, J.-Y. Potvin and J.-M. Rousseau

264 The dynamic multilevel assignment problem as a stochastic extremal process
R. Tadei and N. Ricciardi

275 A global optimization method for nonconvex separable programming problems
H.-L. Li and C.-S. Yu

293 A dynamic approach to multiple-objective resource allocation problem
K.K. Lai and L. Li

310 Determination of optimal path under approach and exit constraints
W.A. Khan, D.R. Hayhurst and C. Cannings

326 A comparison of parametric and non-parametric distance functions: With application to European railways
T. Coelli and S. Perelman

340 House of quality: A fuzzy logic-based requirements analysis
C. Temponi, J. Yen and W.A. Tiao

355 Scheduling preemptive jobs with precedence constraints on parallel machines
K. Djellab

368 A genetic algorithm solution for one-dimensional bundled stock cutting
B.J. Wagner

382 Production, inventory, and pricing under cost and demand learning effects
S. Jørgensen, P.M. Kort and G. Zaccour

396 Optimal stochastic single-machine-tardiness scheduling by stochastic branch-and-bound
W.J. Gutjahr, A. Hellmayr and G.Ch. Pflug

415 Investment and capacity choice under uncertain demand
T. Dangl

429 On the generalizability of advertising pulsation monopoly results to an oligopoly
H.I. Mesak

450 Efficiency based production planning and control models
C.K. Kumar and B.K. Sinha

470 Variance of the output as a function of time: Production line dynamics
B. Tan

485 Solving fuzzy solid transportation problems by an evolutionary algorithm based parametric approach
F. Jiménez and J.L. Verdegay

511 Probabilistic local search algorithms for concave cost transportation network problems
S. Yan and S.-C. Luo

522 A gamma heuristic for the *p*-median problem
K.E. Rosing, C.S. ReVelle and D.A. Schilling

533 Routing heuristics for automated pick and place machines
R.H. Ahmadi and J.W. Mamer

553 On the convergence of multiobjective evolutionary algorithms
T. Hanne

565 Using cutting planes in an interactive reference point approach for multiobjective integer linear programming problems
M.J. Alves and J. Clímaco

578 Decentralized method for computing Pareto solutions in multiparty negotiations
P. Heiskanen

591 Resource levelling for projects with schedule-dependent time windows
K. Neumann and J. Zimmermann

606 Renewal reward processes with fuzzy rewards and their applications to *T*-age replacement policies
E. Popova and H.-C. Wu
